PROFESSIONAL SUMMARY

Data Engineer with 2+ years of experience in ETL pipeline development, data modelling, and machine learning model integration. Strong Python skills across pandas, PySpark, numpy, and FastAPI; hands-on experience with AWS cloud infrastructure, Spark-based pipeline orchestration, relational and non-relational database design, and version control via Git. Experienced building and deploying real-time AI-driven data products independently from problem definition to production. MSc in Data Analytics (Dublin Business School, 2:1). Self-starter who thrives in autonomous, fast-moving environments with high ownership and direct impact.

TECHNICAL SKILLS

- **Python and Libraries:** Python (pandas, PySpark, numpy, matplotlib, FastAPI), strong hands-on proficiency across data processing, automation, and ML model serving
- **ETL and Pipeline Orchestration:** ETL/ELT pipeline development, Apache Spark, Apache Airflow, dbt, data quality frameworks, unit testing, test-driven development principles
- **Cloud and Infrastructure:** AWS (S3, Lambda, EC2, Redshift Serverless), Databricks (Delta Lake), Docker, Terraform, GitHub Actions (CI/CD), Git (version control)
- **Databases:** Relational: PostgreSQL, Redshift, SQLite; Non-relational: Delta Lake (Databricks); strong SQL across complex queries, schema design, and optimisation
- **AI and ML:** Machine learning model training and deployment (LSTM/DeepLog), real-time model serving, AI-driven feature development, monitoring and observability

PROFESSIONAL EXPERIENCE

Data Engineer I *Ipsos, Mumbai* Aug 2022 – Sep 2024

- Designed and maintained ETL pipelines in Python and Spark processing 5M+ records from multiple data sources, delivering reliable, analytics-ready datasets for reporting and analysis
- Built data models and dbt transformation layers across 15+ datasets, enforcing relational database design best practices, documentation, and repeatable testing patterns
- Implemented automated data quality frameworks reducing downstream errors by 25%, with monitoring and validation built directly into pipeline execution
- Developed reusable Python scripts and Spark jobs with comprehensive documentation and version control via Git, adopted as the team's core data engineering toolkit
- Automated reporting workflows reducing manual data preparation time by 40%, enabling analysts to focus on higher-value analysis and insights
- Supported cloud migration from on-premise infrastructure to AWS (S3, Lambda, EC2), working autonomously to design and implement solutions without direct supervision
- Collaborated cross-functionally with analysts, QA engineers, and project managers, maintaining strong communication and attention to detail throughout delivery

Sales Assistant *Eurospar, Dublin* May 2025 – Present

- Demonstrated strong communication and people-oriented skills in a fast-paced environment while completing full-time postgraduate studies

PORTFOLIO PROJECTS

SENTINEL.log github.com/nameisrohit/log-anomaly-detector

- Trained, refined, and deployed a DeepLog LSTM machine learning model for real-time anomaly detection; integrated into a Python FastAPI application with a live WebSocket monitoring dashboard
- Fully containerised with Docker; unit tested and documented end-to-end; demonstrates ML model training, deployment, and production observability in a single project

Ireland Rent Tracker ireland-rent-tracker.streamlit.app

- Built a full production data pipeline autonomously: AWS S3 ingestion, Redshift Serverless warehouse, dbt transformations with automated quality tests, Airflow orchestration, and a real-time dashboard; deployed via Docker, Terraform, and GitHub Actions CI/CD

EDUCATION

MSc in Data Analytics *Dublin Business School* Completed Jan 2026 Classification: 2:1
Coursework: Machine Learning, Pipeline Architecture, Data Modelling, Cloud Computing, Data Governance

Bachelor of Science *University of Mumbai* 2019 – 2022

ADDITIONAL

Work authorisation: Irish Stamp 1G visa — full open market work rights, no sponsorship required | **Location:** Dublin-based; happy with one in-person day per month in Galway
